

## UCSF Research and Academic Building at ZSFG

February 2021 Update

**Recent Activity:**

- Rebar installation and concrete pours have begun for the ground level of the RAB.
- Work began to connect the new roadway on the north side of the RAB site with the campus drive traffic circle, including replacement of the ADA ramp at that junction.

**Anticipated Activity in the Near Future:**

- The next virtual RAB Town Hall meeting is scheduled for March 17<sup>th</sup> from 12-1pm.
- The steel frame of the new building will start to become visible above the fence.
- Underground utility work in 23<sup>rd</sup> Street will conclude. No further work is expected in the area until later, when the fence is restored.
- Upcoming work to erect steel beams and install metal decking for each floor will be noisy. The RAB project team and DPH are coordinating to mitigate the impact of this noise; please contact the project team for more information.

**Reminder of the Month: Mark your calendars for the 3/17 Town Hall!**
