

Recent Activity:

- Project contractor **The Boldt Company** interviewed 3 final design team candidates on November 1st, in partnership with representatives from UCSF Real Estate and from the UCSF at ZSFG community.
- Boldt is actively negotiating with these design team finalists to select one as the project architect.

Anticipated Activity in the Near Future:

- The ZSFG Dean's Office will partner with the selected architect to finalize a structure for the design process, including modes of input from users.
- ZSFG Dean Sue Carlisle will present a town hall introducing members of the Design-Build Team and an overview of the design process. Date TBA.

Reminder of the Month:

- We need your participation in design! Think about standard and specialty spaces you use and how they could be optimized. We are planning for many design discussion meetings that focus on 5 space type categories:

These categories describe most of the space types we use, but are not meant to limit how we think about the wide range of diverse research and academic groups in our community.

They will serve as a starting point for understanding and addressing the complex design needs of UCSF at ZSFG.

Action Steps: Share this information, and think about space types that are important to your research and educational work
