

UCSF Research and Academic Building at ZSFG

Welcome to the eighth edition of the UCSF Research and Academic Building at ZSFG project newsletter, an update with news and information about the planning and construction of a new UCSF facility at ZSFG.

This newsletter will be sent via email to the UCSF community at ZSFG and can also be found [online](#).

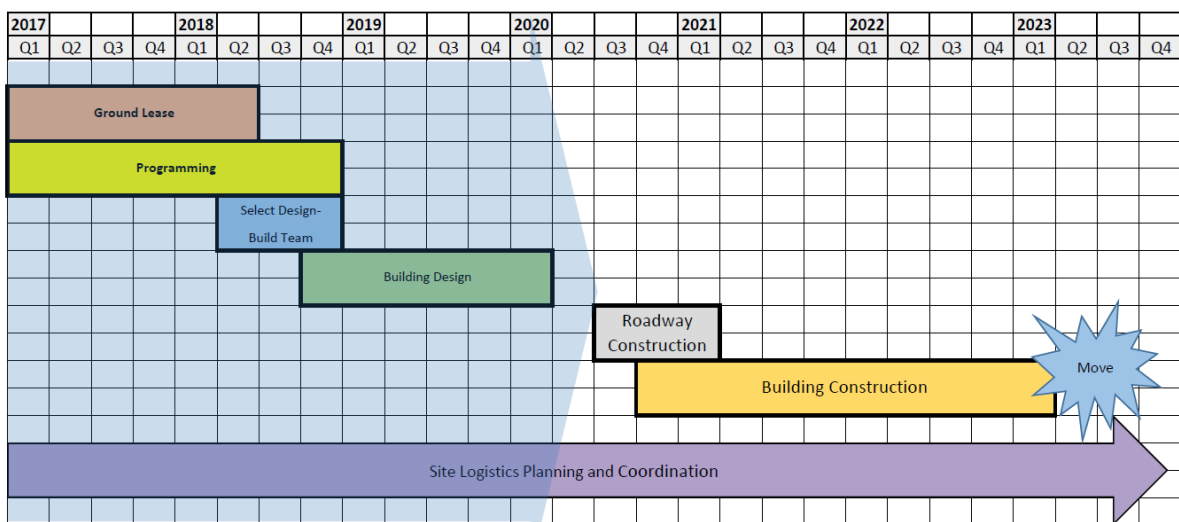

Construction to build a new roadway and UCSF research building at the ZSFG campus has officially started! Work to set up the construction site will continue through August, with demolition of the existing parking lot scheduled to begin in mid-August. An updated timeline graphic for the project is below and the following page has more information about what the construction site on the ZSFG campus east of Building 9, between 23rd Street and Building 5, will look like.

Please join us for a Town Hall, which will include an overview of the construction site and logistics. All are welcome to join!

Hosted by Vice Dean Sue Carlisle and the Project Team.

Updated project schedule

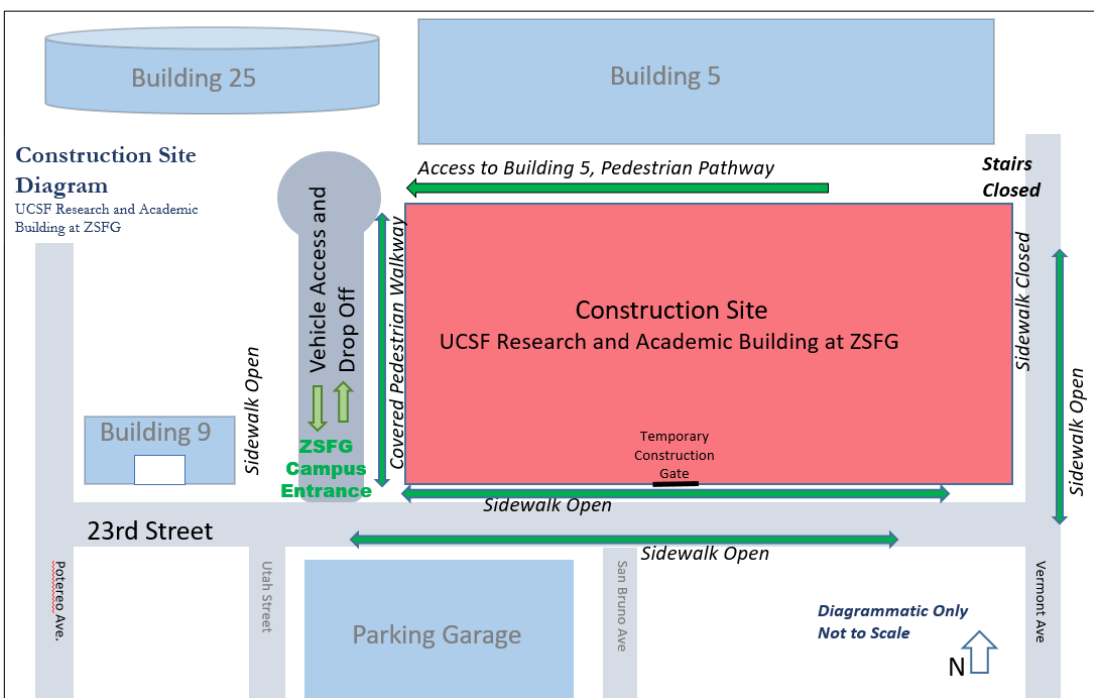

This graphic provides a broad overview of the project phases and how they overlap.

Construction Site Information

Construction to build a new roadway and UCSF research building at the ZSFG campus is starting with work to set up the construction site. Some highlights:

- A covered pedestrian walkway along the west side of the site has been installed to allow patients, staff, and visitors to access the ZSFG campus from 23rd Street.
- A temporary truck gate will be created from 23rd Street by removing a section of the fence and brick. Brick that is removed will be stored, protected and reinstalled with new section of the iron gate, all of which will match existing historic wall.
- The stairway to/from Building 5 to Vermont Street has been closed.
- Emergency response access will be available at all times.

Efforts to reduce the impacts of construction are also being made, including the following mitigations:

- Dust monitors have been installed on the edges of the jobsite. They provide real-time information and alert the project team if air quality does not meet established standards.
- Water will be used on site during excavation, demolition, and off haul to control dust
- Noise levels will be regularly monitored.

Project Contacts

Questions or concerns about the UCSF Research and Academic Building at ZSFG project can be emailed to UCSF-RAB-ZSFG@ucsf.edu, for response by the building project team, or by phone at 415.514.7661.

The UCSF RAB at ZSFG project

UCSF, which has a long-standing partnership with the City and County of San Francisco, is building a new five-story facility that will contain state-of-the-art research, teaching, and administrative space.

Construction of the new UCSF research and academic building is scheduled to continue through early 2023.
