

Clinical Sciences Building Retrofit and Renovation

The Clinical Sciences Building (CSB) is being renovated to meet current seismic safety requirements and to provide instructional and meeting spaces that support modern teaching and research. The project will also connect Parnassus Ave. to the interior Saunders Court with a new entrance and gateway. Construction is scheduled to be complete in late 2019.

April 2019

Noisy work

- Demolition of a hallway wall in UCH will take place as part of the construction of the new pavilion. A new permanent wall will be built once adjacent pavilion work is complete.

Construction Activity

- Frequent concrete pours are taking place throughout the project.
 - Some of the pours from Parnassus Ave. from April- June will include temporarily closing a crosswalk at Third Avenue; detour routes will be posted and flaggers will be present to help direct traffic.
- Shear wall construction continues throughout the building.
- Metal decking to create the floor is being installed at all levels.
- Installation of infill structural steel also continues throughout the building.
- Installation of the steel frame for the pavilion will resume in May, following foundation waterproofing and construction of pavilion lower level walls.
- Initial work for the installation of interior unities is ongoing.

Infrequent, short (2-5 minute) closures of the pedestrian spine between Nursing and UC Hall are expected; flaggers will be present to provide direction.
