

Recent Activity:

- The latest issue of the project newsletter was distributed on September 28th, and is now available [online](#) at space.ucsf.edu.
- Out of a pool of 13 architect teams who expressed interest in the project, 3 were selected for a short list of qualified firms on October 10th.

Anticipated Activity in the Near Future:

- Interviews with 3 final architect candidates will be conducted by Boldt, UCSF, and members of the UCSF at ZSFG community on November 1st. The selected firm will then begin work on design and getting user input.
- Once the main members of the design-build team are in place, the ZSFG Dean's Office will schedule a town hall in the fall to introduce them.

Reminder of the Month:

- Two-way communication is essential to the optimal success of this project. Here are the channels of communication in place:

- o Each month: this flyer, stakeholder meetings
- o 3-4 times per year: [newsletters](#), town halls, community meetings with DPH, DPW, SFMTA, and the ZSFG neighborhood
- o Any time: the [project website](#) and [FAQs](#) at space.ucsf.edu, & the project [email address](#)

- Are these modes of communication effective? Please give us your input.

Action Steps: Share this information with your groups, ask for their suggestions about how to make communication more effective
