The project

The Clinical Sciences Building (CSB), opened in 1933, is one of the oldest buildings on the Parnassus Heights campus site. It is being renovated to exceed current University of California seismic safety requirements and to provide spaces that support modern teaching and computational research. The project will also connect Parnassus Ave. to Saunders Court with a new entrance and pass-through. The project is scheduled to be complete in fall 2019.

Update: Fall 2017

- The project team is finalizing staging and other construction plans.
- Construction activity is scheduled to resume at the end of the year.

Project and construction questions should go to CSB_Seismic@ucsf.edu
